

## M.R.(Site Services)Ltd

### 35 years' experience of Roof and Cladding Details & penetrations.

Design, manufacture and installation of weathertight seals for use on any roofing material, profile or surface finish, or where welded joints are impractical. Working in accordance with ISO 9001:2015 Roll-a-Flex cold applied sealing system is fully tested, offers first-class weatherproofing, can be coloured to match existing materials and is fully warranted with insurance backed guarantees, installed by NVQ fully trained, & CSCS certified operatives  
 One stop shop for Roll-a-Flex - Quantum walkway and safety products, Access hatches - Aluminium site welding - Snow guards  
 Products tested, CE marked and Patented as applicable

M.R (Site Services) Ltd have been welding on projects large and small on a global basis for many years, Roll-a-Flex is approved by all major roofing system suppliers including TATA, Euroclad, Kalzip, Ash and Lacey, Omnis, Bemo, Centria, CA, Alumasc, etc and the reputation of Roll-a-Flex is similar to that achieved by the welding part of our company indeed as is the other products and services we offer.

M.R (Site Services) Ltd are members of the NFRC, MCRMA, TWI, I.o.R, CPD, our insurance backed guarantee is provided by QANW, Intertek monitor, Audit and certify our BSEN ISO 9001;2015 Quality System, we are CHAS and Construction Line certified. All our welders are coded to EN 287-2/BS EN ISO 9606-2:2004 and welding procedure complies with EN 288-4.

Roll-a-Flex, is a flexible reinforced sealing system developed to enable M.R.(Site Services) Ltd to provide an alternative weld free service and solution to the profiled metal roofing industry (similar to the works carried out on aluminium systems) such as penetrations, hips, valleys and other details requiring redevelopment of the roofing system where welding was either not possible or the risks involved were too great.

Our system is applied in accordance with best practise and technicians are fully trained, NVQ certified and CSCS card carriers.

Quantum safety products including walkways, steps ladders, edge protection, parapet rails, access hatches, snow and ice guards are all available and specifically designed for the roofing industry
