### Product Information

**Quantum Leaf guard meets the demanding specifications of the UK aluminium standing seam roofing market.**

#### **Construction**

Manufactured from 1.2mm gauge aluminium mesh, to Commercially Pure Grade 1050.

#### **Finish**

Can be supplied either mill-finished, powder coated to match BS/RAL specifications

#### **Fixing**

Quantum Leafguard is attached to the gutter with standard fixings (at high level) or alternatively via the unique MRSS non-penetrative Roll-a-Flex system. Installation must be carried out by our own qualified personnel.

#### **Durability**

Strong and lightweight. Corrosion-free.

#### **Dimensions**

Normally supplied in 2.5 metre lengths. Can be custom modified to fit any gutter or gully.

#### **Weight**

Approx 1.35 kg per 2.5metres (excluding fixings) based on 600mm gutter width.

#### **Handling**

Standard lengths can be unloaded by fork-lift truck. Delivery to the roof is by crane, using web slings.

#### **Storage**

For short-term outdoor storage the packages should be stored on weatherproofed sloping supports.

#### **Maintenance**

Should be inspected annually.
